

3D Legend	Cannabinoids	Treatments	+ Compounds	Treatments
	Cannabigerol CBGA Olivetolic Acid			
	Tetrahydrocannabinol THCA Acidic Δ9 (C ₅)	1) Requires 30 mins. in the oven. 2) When eaten raw (unheated:) ➢ Anti-inflammatory, ➢ Anti-epileptic, and ➢ Anti-proliferative.		
	Cannabidiol CBDA Olivetolic Acid	1) Requires 60 mins. in the oven. 2) When eaten raw (unheated:) ➢ Anti-proliferative, and ➢ Anti-inflammatory. ➢ Not fully elucidated.	+ β-caryophyllene = 1st Med Vapour During CBD conversion	Cytoprotective, Neuro-protective, Analgesic, Anti-malarial, Anxiolytic, and Anti-inflammatory. (Increases CBC and CBE content)
	Tetrahydrocannabinol THCA Acidic Δ8 (C ₅)			
	Cannabinol CBNA Olivetolic Acid			
	Cannabielsoin CBEA Olivetolic Acid			
	Cannabichromene CBCA Olivetolic Acid	1) Requires 60 mins. in the oven. 2) When eaten raw (unheated:) ➢ Anti-bacterial, and ➢ Anti-fungal. ➢ Not fully elucidated.	+ β-sitosterol = 2nd Med Vapour During CBC conversion	5-α-reductase Inhibitor, Anti-inflammatory, and Chronic Edema treatment. *Avoid if Breast feeding / Pregnant (Increases CBC and CBE content)
	Cannabicyclol CBLA Olivetolic Acid			

Acidic Olivetolic (C₅) Chart – Vapourizer Cannabinoid Temperature Dial[▼] Æ 2016, Virtually Real Applications
